

Vanny Minanda

DATA SCIENTIST | BANGKOK

SKILLS

- Microsoft Azure
- Machine Learning & AI (ETL Pipelines, Scikit-learn, PyTorch, Keras, NLP)
- Big Data Analytics (Pandas, Polars, PySpark)
- Databases (SQL, BigQuery, PostgreSQL, MongoDB,, ChromaDB)
- Data Visualization (Tableau, Power BI)
- Version Control & Dev Tools (Git, GitHub)
- Optimization & Metaheuristic Algorithms
- Automation & Orchestration (n8n, Langflow)
- LLM Systems & Agentic AI (RAG, Agentic AI, LangChain, LangGraph, Prompt Engineering)
- Document Intelligence (Object Detection-based OCR, Agentic Document Extraction with RAG)

CERTIFICATIONS

- Microsoft Azure Fundamentals AZ-900 (Certified)
- Microsoft Azure Data Scientist Associate DP-100 (in progress)

LANGUAGES

English Bahasa Indonesia Chinese (Basic)

EDUCATION

ABOUT ME

I hold a PhD with a focus on algorithm optimization, data analysis, and programming. My work centers on optimization algorithms and data-driven systems, with exposure to applied AI tools and cloud-based ML workflows on Microsoft Azure.

2019 – 2024

Doctoral in Industrial Engineering
Yuan Ze University, Taiwan

2017 – 2019

Master in Industrial Engineering
Yuan Ze University, Taiwan

2025 | Post-doctoral research fellow

Developed Optimization Models for Medical Staff Scheduling and Homecare Routing in Taiwan

2022 – 2024 | Government-funded project

Built an IoT-based monitoring system for hospital waste with real-time tracking, route optimization and web dashboard integration.

2022 – 2024 | Government-funded project

Developed an automated system for optimizing hospital waste collection routes in real-time.

2021 – 2022 | Academic-Industry Project

Developed a Python application to forecast demand for apparel suppliers using real historical data from an apparel supplier in Taiwan, accounting for COVID-19-related supply chain fluctuations.
